A U D I O V I D E O M E T A L S I N C .

AVM established in 1995 is a designer and manufacturer of high quality metal racks and rack equipment for the audio and video production and distribution industry. Automated CNC machinery allows for close manufacturing tolerances, ensuring that accessories and components fit and are interchangeable. AVM products are locally manufactured in Aurora, Ontario, Canada. AVM is a unit of VE Group.

AVM is proud to offer this unique product as a solution to your pre-production installs.

Rack POD

Rack Pods are designed to be shipped fully loaded and tested to arrive on site ready for hook up. Multiple rack pods are connected with raised flooring to create any size of equipment room needed. Each Rack Pod consists of four 44RU or two 44RU 36" deep, welded, gangable racks that securely mount to a 6" high metal skid constructed with 4"x6" structural tubing positioned between two layers of 3/8" laser cut aluminum allowing access from all sides. A variety of layouts are now available with these two standard configurations.
